Email: [anest.developer@gmail.com](mailto:anest.developer@gmail.com)

### Summary

I'm a Flutter developer who's been working as a freelancer, building real-world mobile apps for clients using Flutter, Firebase, and Supabase. I enjoy turning ideas into functional, user-friendly apps with clean designs and smooth performance. I'm used to handling everything from the frontend to the backend, and I always aim to deliver work that actually helps people solve real problems.

### Skills

Languages & Frameworks: Dart, Flutter

State Management: Bloc, Riverpod

Backend & Databases: Firebase, Supabase, Firestore, REST APIs

Tools & Workflow: Git, GitHub

### Projects

E-commerce Mobile App

Tech: Flutter, Firebase, Firestore

An on-demand drinks delivery app offering seamless ordering and delivery of beverages like juice, wine, and spirits. Built to bring the club experience to the comfort of users' homes.

Dashboard App for a Food Processing Company

Tech: Flutter, Supabase

A custom mobile dashboard developed for a CEO to manage staff tasks and responsibilities.

Enables role-based task assignments and daily operations tracking.

## Church Mobile App

Tech: Flutter, Firebase

A social and spiritual platform for a church community. Includes social walls, Bible versions, hymn/song books, event updates, group interactions, and a live-streaming feature.

## Experience

Flutter Developer (2021 Present)

- Collaborated with clients across various sectors to develop and launch mobile apps tailored to their specific needs.
- Delivered high-quality apps for use in e-commerce, churches, and business management.
- Took charge of full development cycles from user interface design to backend integration and final deployment.
- Wrote clean, maintainable code and ensured long-term support and feature updates.

## Education

Moringa School Software Development Program

Nairobi, Kenya

Completed practical, project-based training in software development, with a focus on mobile development using Flutter.

Also trained in web development using React and Ruby on Rails.
